**REQUEST FOR PROPOSAL RFP TDD 25-21**  
**Okaloosa County Offshore Artificial Reef Construction Project-**  
**Deepwater Large and Small Tetrahedrons**

**I. BACKGROUND:**

The purpose and intent of this Request for Proposal is to select a qualified contractor for the acquisition, construction, and deployment of multiple offshore marine artificial reefs by deploying numerous multi-sided, prefabricated concrete artificial reef modules. At least 60 of these modules must be at least 6 feet tall. The reefs will be deployed in the Gulf of Mexico within the Large Area Artificial Reef Site C (LAARS C) active permitted area in Florida waters offshore of Okaloosa County in depths 100-110ft.

This project is shared funding between Florida Fish and Wildlife Conservation Commission and Okaloosa County. Available funding for this project is \$120,000.00. Contractor selection will be administered through the criteria outlined in the below request for proposal process considering the greatest quantity and quality of product and service offered. Contractors must submit proposals for what they can construct and deploy as specified in the deployment plan with the budgeted amount of \$120,000.00. All artificial reef construction and deployment must be completed by July 31, 2021.

**II. SCOPE OF WORK**

**A. DEFINITIONS**

The terms and abbreviations used herein shall have the meanings as defined below.

1. “Artificial reef” means one or more manufactured or natural objects intentionally placed on the bottom in predominantly marine waters to provide conditions believed to be favorable in sustaining, or enhancing the spawning, breeding, feeding, or growth to maturity of Florida’s managed reef associated fish species as well as to increase the productivity of other reef community resources which support fisheries. Included in this definition are artificial reefs developed with one or more of the following additional objectives: enhancement of fishing and diving opportunities, fisheries research, and fisheries conservation/preservation purposes.
2. “Permitted area” means an area with discrete boundaries inside of which one or more artificial reefs may be located and for which all required permits and authorizations have been obtained. These permits and authorizations include artificial reef permits issued by the Florida Department of Environmental Protection and/or the Army Corps of Engineers and other permits, licenses, or authorizations required by any governing body.
3. “Staging site” means a land-based holding area for artificial reef material where such material is stored and prepared for transportation to an approved artificial reef site.
4. “Prefabricated modules” means structures specifically designed and built for use as artificial reefs and which meet the environmental safety, durability, and stability requirements of this rule, as well as providing complexity and texture which are suitable as habitat for fishes and for colonization by encrusting marine organisms.
5. “Contractor” means the vendor contracted by the County to provide services defined in the scope of work and meets the definition of “Contractor” in section 119.0701(1) (a).F.S.
6. “Multi-sided module” means a polyhedral artificial reef unit consisting of three or more polygonal sides. For the purpose of this agreement, a dome shaped module is considered a multi-sided module. A tetrahedron (three sided artificial reef structure with an open or solid fourth side serving as a base) is an example of a multi-sided module.

**B. LOCATION**

The location of the artificial reef modules are as specified in the deployment plan (see Table 1 and attached maps). The specified artificial reef modules are to be deployed as five patch reefs offshore Okaloosa County in the LAARS C permitted area. This is an authorized artificial reef permit area with the U.S. Army Corps of Engineers. The permit for this area is:

**C. MINIMUM MATERIAL STANDARDS**

Artificial reef materials placed in the LAARS C (Table 1) must consist of multi-sided, prefabricated artificial reef modules (at least 60 modules at least 6ft tall) each weighing at least 6,000 lbs. All artificial reef modules must be composed of marine grade concrete with a minimum strength of 4,000 pounds per square inch (psi). Modules shall consist of concrete and embedded stone, shell, or other surface treatments to increase surface roughness (no external metal framework) with multiple openings all the way through the outer surface to allow for water circulation and access by fish.

Open-bottom prefabricated reef modules may not be used unless the module has a top opening sufficiently large to allow for turtle escapement. Approved open-bottom modules include:

- a) Three-sided modules where each side of the top opening is at least 36-in in length along its edge.
- b) Four or more sided modules where each side of the top opening is at least 40-in in length along its edge.
- c) Modules with a round opening with a diameter of at least 40-in (oval openings are not allowed unless a 40-in diameter circle space can fit within the oval).
- d) Modules that are approved by the Florida Fish and Wildlife Conservation Commission as being turtle friendly.

No open-bottom modules are allowed that include additional modules, discs, or other materials stacked, placed on or immediately adjacent to the top opening, as they may prevent turtles from easily escaping.

**D. DEPLOYMENT PATTERN STANDARDS**

Materials proposed must be deployed within the specified permitted area (LAARS C). The bidder shall state the number of proposed modules in their bid response. All artificial reef modules shall be planned a minimum of ¼ mile from all permitted area boundaries and no more than 100ft. from neighboring modules. For deeper depths, strong current, wind or sea conditions, a greater buffer is strongly encouraged to ensure all deployments fall within the permitted area.

**E. CALENDAR OF EVENTS**

Project construction and deployment must be completed prior to July 31, 2021. No compensation will be made for any work completed after this date.

**F. DEPLOYMENT AND MATERIAL PLACEMENT**

1 During deployment of the artificial reef material, the transport vessel must be effectively moored through double anchoring, be spudded down, or otherwise be held securely in place with minimal movement (+/-50 feet) to ensure accurate placement of the modules on the bottom. Any machinery used to move and deploy the reef materials should be sufficiently powered/maneuverable and capably operated to ensure timely, effective, and safe off-loading of materials. The tug or transport vessel shall meet all U.S. Coast Guard certification and safety requirements, be equipped with a working, accurate Global Positioning System (GPS) unit and other marine electronics including a working VHF radio. Effective and reliable communications shall always exist between the transport vessel captain, the transport vessel crew, and the designated County observer on site. Deployment operations will only be initiated when sea height in the operations area is no greater than two to four feet as forecast by the nearest NOAA weather office. Either the FWC's observer, the County's observer or the contractor's vessel captain reserves the right to suspend off-loading operations if positioning or other deployment objectives, including safety of personnel and equipment, are not being met.

2. The Contractor shall provide a complete inventory list to the observer, designed by the County, to validate accuracy of cargo manifests prior deployment.

3. The minimum vertical clearance shall be maintained above the highest point of the reef modules in each of the permitted areas (in accordance with the special conditions of the applicable US Army Corps of Engineers permits (Table 1).

4. All special and standard manatee protection requirements described in the Army Corp of Engineers Permits for these reef sites must be met.

5. The County's Contract Manager or County's designated official observer shall oversee the temporary marking of each reef deployment location permit boundaries in advance of reef materials deployment to assist the contractor in the proper placement of the artificial reef materials. The markers shall be buoys of sufficient size and color to be clearly visible to the tug captain, and sufficiently anchored and with sufficient scope so that they will not drift prior to deployment. Precise GPS placement of marker buoys that do not shift position are important to ensure the reef is constructed within the permitted area and accurately placed at the designated deployment location(s). The County will not pay for materials placed outside the permitted area.

6. The County's Project Manager or County's designated official observer shall remain on site during the entire deployment phase of the operation and confirm the GPS coordinates of the individual placements as well as the maximum vertical relief of the constructed reefs using a fathometer after the reef construction has been completed.

7. Both the County and its Contractor shall have on site current nautical charts of the deployment area, with the permitted site indicated on the chart. The proposed patch reef coordinates and the corner coordinates of the permitted area will also be in possession of the County's observer and the contractor when onsite.

8. Both the County and its Contractor shall be prepared to remove any floating debris that might occur during deployment. Having boat hooks, dip nets, and other equipment on board to enable efficient collection of unanticipated floating debris is strongly encouraged. The County shall be responsible for ensuring that any floating debris discovered during

deployment operations (e.g., wood, floating line, aluminum cans, plastic bottles, or other floating materials) shall be collected and transported back to land for proper disposal.

9. The Contractor agrees to allow the County and Commission to conduct on-site inspection of the artificial reefs before, during, and after the deployment.

#### **G. LIABILITY AND RESPONSIBILITY FOR REEF MATERIALS**

Upon initiation of the handling and movement of these artificial reef materials by the County's contractor, all liability, risk of loss and responsibility for the safe handling, storage, transportation, and deployment of the materials shall be borne by the Contractor. This liability, assumption of risk and responsibility shall remain with the Contractor until the materials are deployed at the permitted reef site in accordance with the specifications in this Agreement.
